

Loading File in S3 Bucket

This document will provide you step by step guide on how to upload a file in an S3 bucket that you have already created.

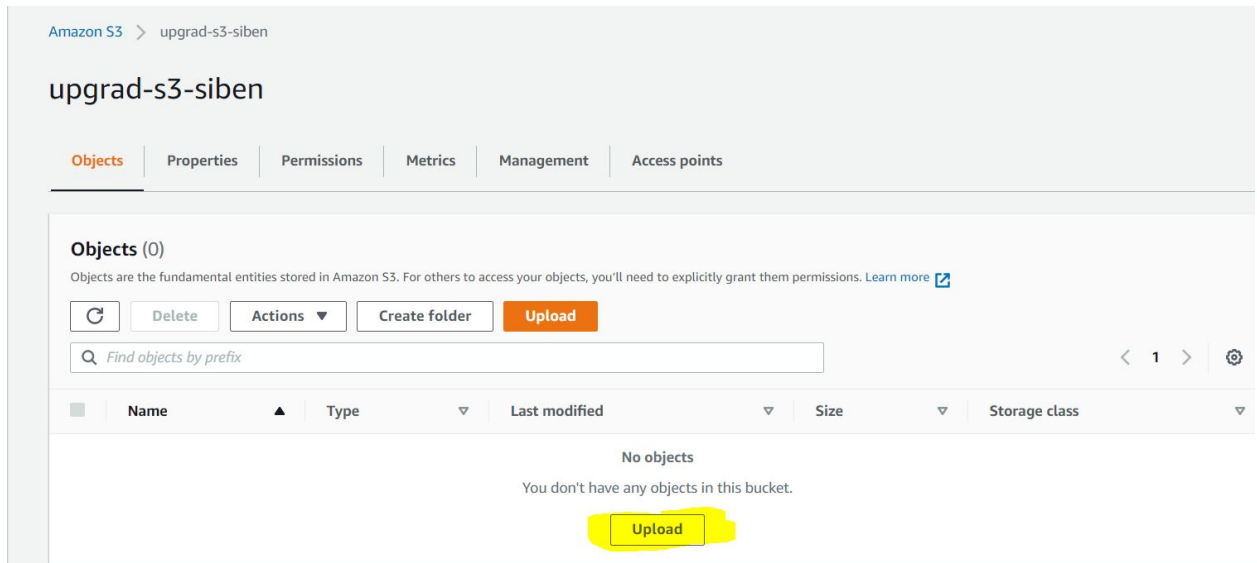

1. Once you have successfully created an S3 bucket, your S3 Management Console will look something like as shown below.

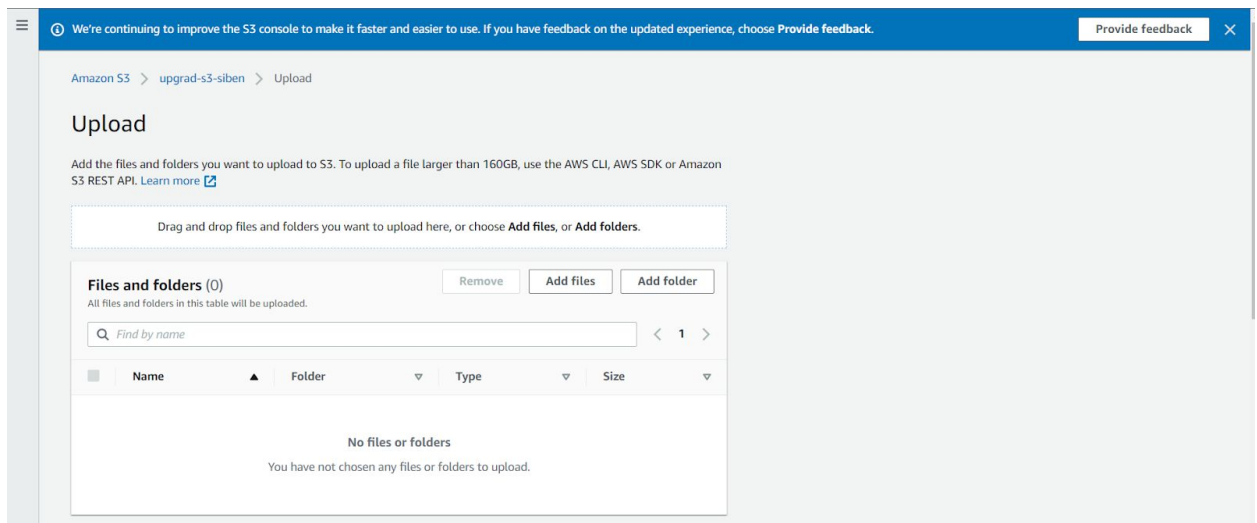

2. Here, you need to click on the name of the bucket in which you want to upload the file. Click on the name of the bucket that you have created.

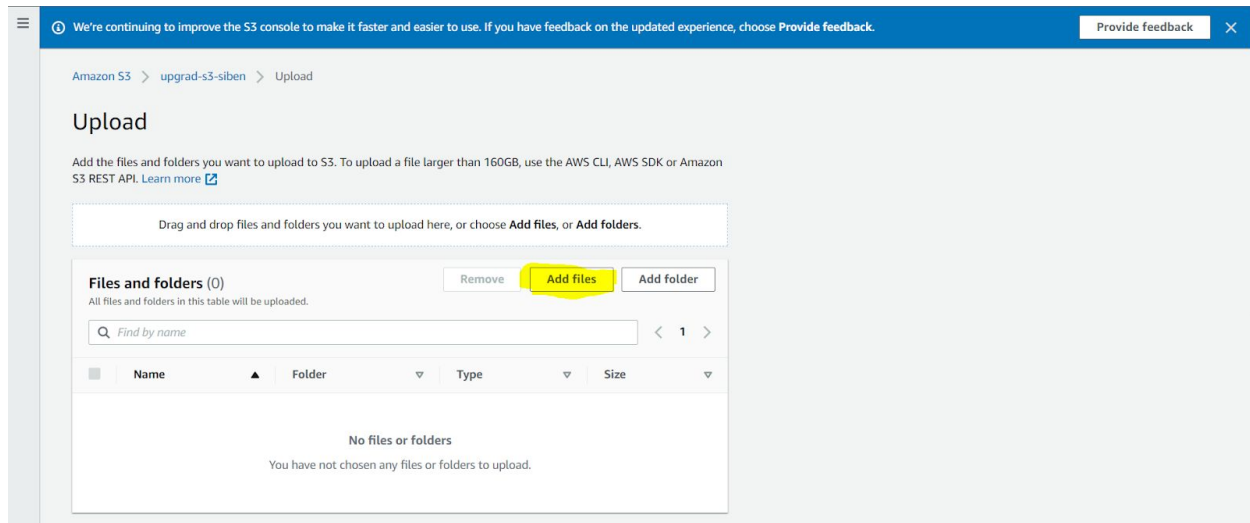

3. Once, you do so, you will be redirected to a new page. On this page, you need to click on the **Upload** button as shown in the image below.

4. You will be redirected to a new page as shown below.

5. On this new page, if you want to upload a file, you need to click on the **Add files** button as shown below. Select the file that you want to upload, in this case, the **index.html** file. Select this file from the location where it is saved on your computer.

- Once, you have selected the correct file that you want to upload from your computer click on **Open** button as shown in the image below.

Name	Date modified	Type	Size
 index	13-01-2021 21:01	Chrome HTML Do...	1 KB

- Once you do so, your S3 page will look something like this.

Upload

Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDK or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose **Add files**, or **Add folders**.

Files and folders (1 Total, 66.0 B)

Remove

Add files

Add folder

All files and folders in this table will be uploaded.

Find by name

<

1

>

<input type="checkbox"/>	Name	Folder	Type	Size
<input type="checkbox"/>	index.html	-	text/html	66.0 B

- Next you need to scroll down and there you will see an **Upload** button. You need to click on it to upload this file.

Destination

Destination
s3://upgrad-s3-siben

Destination details

The following bucket settings impact new objects stored in the specified destination.

Bucket Versioning
When enabled, multiple variants of an object can be stored in the bucket to easily recover from unintended user actions and application failures. [Learn more](#)
Disabled

Default encryption
When enabled, new objects stored in this bucket are automatically encrypted. [Learn more](#)
Disabled

Object Lock
When enabled, objects in this bucket might be prevented from being deleted or overwritten for a fixed amount of time or indefinitely. [Learn more](#)
Disabled

⚠ We recommend that you enable Bucket Versioning to help protect against unintentionally overwriting or deleting objects. [Learn more](#)

Enable Bucket Versioning

► Additional upload options

Cancel

Upload

- Once, you click on the **Upload** button, the file that you have selected will be uploaded to the bucket and you will get a screen as shown below. It says, that **upload succeeded** and you will also see the **index.html** file present in the **Files and folders** section.

Upload succeeded
