

Deleteing a DynamoDB Table

This document lists the step that you need to follow to delete a DynamoDB table.

1. To delete a table, select the table you want to delete and click on the **Delete table** button in the top-left corner as shown below.

2. A prompt will appear asking for your confirmation to delete the table. If you want to create a backup for this table before deleting this table, select the checkbox next to it. If you do not want to backup, leave that unchecked. In the textbox, you would need to type **delete** to confirm the deletion. Make sure that you have selected the first checkbox to delete all CloudWatch alarms for this table as shown below. Finally, click on the **Delete** button as shown below.

Delete table
×

Are you sure you want to delete this table: **upgrad-registration**?

☒ Delete all CloudWatch alarms for this table

☐ Create a backup before deleting this table

Enter the word **delete** in the box below to confirm.

delete

Cancel
Delete

- A new prompt will appear with the text that says **Table was deleted successfully**. Finally, click on the **Close** button as shown below.

Delete table
×

!
Table was successfully deleted, but we were unable to delete your Auto Scale configurations.
Reason: Not Authorized

Close

- Now, you would see that there is no table in your DyanmoDB database.

So, with this, you learnt how to delete a DynamoDB table.
