Notes on the NuvePro Lab

While you are working on your lab, there are some critical pointers that we'd like you to keep in mind. These are as follows:

- It may take some time (5 mins) for your AWS account to get activated after you click the 'Jump to Console' button the first time. Please get in touch with your student mentor if you are unable to access your AWS dashboard even after 1 hour.
- As a general practice, please shut down your EC2 instances when you are not using them.
- Your usage bill information is displayed on the left panel of your NuvePro dashboard. Monitor it closely.
- At any given time, you will be assigned a 'budget value'. This value can only be increased in certain steps. You can find out this value from your student mentor. From this budget value, subtract your usage to find how much credit you have remaining.
